

FIND SAVINGS ALL OVER YOUR HOME

Being good stewards of the environment is everyone's responsibility. By working together we can make a positive impact in our community.

Here are a few tips to get you started.

WINTER TIPS

LED Holiday Lights use far less electricity, burn cooler and last longer.

Use ceiling fans to circulate warm air in your home.

Close doors and vents of unused rooms in your home.

Keep your unused fireplace damper closed to conserve warm air.

Switch your television to 'home mode' for up to 30 percent energy savings.

Weatherize your home to save on heating and cooling bills.

Lower the water heater 10-15 degrees to reduce the amount of fuel needed.

Change your air filters regularly for a more efficient cooling system.

SUMMER TIPS

Replace your incandescent light bulbs with florescent or LED light bulbs.

Use ceiling fans to circulate cool air in your home.

Close the blinds to block out hot summer sun and keep inside temperatures low.

Increase your thermostat 8 degrees before leaving the house in summer.

Reduce usage during peak hours of 3 - 7pm.

Use EPA ENERGY STAR® rated products.

Change your air filters regularly for a more efficient cooling system.

Plant vegetation around your home to provide insulation from the weather.
